Bachelor of Science in PUBLIC HEALTH

stockton.edu/hlthschool
Bachelor of Science in Public Health | BS

ABOUT THE PROGRAM

Public health is concerned with protecting the health of entire populations. These populations can be as small as a local neighborhood, or as big as the world (Global Public Health). Most people do not realize the impact that Public Health has on their lives, but there are examples all around you.

Public Health is the science of protecting and improving the health of communities through education, promotion of healthy lifestyles, and research for disease and injury prevention. Public health professionals analyze the effects of genetics, personal choice, and the environment on peoples’ health.

Requirements for a Bachelor of Science in Public Health:
Open to Stockton students in good academic standing

- Students are advised to declare their major by the beginning of the sophomore year to provide sufficient time to meet all program requirements for graduation by the end of their senior year.
- Credit for transfer students will be considered on an individual basis.
- An interview by appointment with a Public Health faculty member is strongly recommended prior to declaration of the major.
- A “C-” or better in all Public Health courses (or their equivalents) and a 2.0 PUBH GPA or higher is required for graduation.
- Students have the opportunity to earn Minors in a variety of fields such as Gerontology; Holistic Health; and Women, Gender, and Sexuality Studies.
- Spanish or another modern language is recommended for Public Health majors.
PROGRAM CONCENTRATIONS AVAILABLE

- Health Administration
- Community Health Education*

* Community Health Education concentration graduates are eligible to take the examination to become a Certified Health Education Specialist (CHES).
