Changing the Course Sections Displayed on the Faculty Dashboard

A faculty member is seeing something like the following in the Faculty Dashboard Channel:

![Faculty Dashboard Channel](image1)

S/he is teaching multiple course sections in the Fall 2009 semester and wishes to see all of the course sections for that semester. S/he needs to edit the channel settings to change how course sections are displayed.

To do this, click on the Edit button in the top right portion of the channel (looks like a tiny pen or pencil)

![Edit Button](image2)

Change the settings to display the desired attributes for Term, Number of Rows (i.e., course sections) to display, and then click on Apply.

![Settings](image3)

For example, change “From Term” to Summer 2009 to get the result shown in the next screenshot.
