Thank you to SIFMA member firms for their generous contribution of time, talent, and financial support!

Thank you to Richard Stockton College for hosting the New Jersey South Stock Market Game 2010 Awards Ceremony!
The Securities Industry and Financial Markets Association (SIFMA) Foundation is dedicated to providing financial education for people of all ages through innovative programs such as The Stock Market Game™, which has served more than 12 million students since it began in 1977, and Tomorrow’s Money, an online suite of financial resources for women, Spanish speakers, and young people. Additional information about the Foundation and its programs is available at www.sifma.org/education. The Foundation’s parent organization, the Securities Industry and Financial Markets Association, works to represent the interests of more than 650 member securities firms, banks and asset managers around the world by promoting policies and practices to expand and perfect markets, foster the development of new products and services, and enhance the public’s trust in the markets.

The Stock Market Game (www.stockmarketgame.org) is an online educational activity for students that has served more than 12 million young people in grades 4-12 since its inception in 1977. SMG introduces students to the financial markets with its integrated curriculum as they learn math, economics and the importance of long-term saving and investing. Teams of 3-5 participants invest a hypothetical $100,000 in real stocks, bonds and mutual funds, learning cooperation, communication and leadership as they manage their portfolio.

InvestWrite (www.investwrite.info) is a highly successful extension of The Stock Market Game program. Launched in March 2004, InvestWrite is an innovative national writing competition that helps students sharpen critical thinking skills as they compose essays on investment-related topics. The program builds a bridge between classroom learning and potential real-world investment decisions. Students are provided a topic and an investment scenario, which requires them to assess, research, and then formulate possible solutions based on their own findings, logic and ideas.
Overview of The Stock Market Game
A program of the SIFMA Foundation

The SIFMA Foundation’s Stock Market Game™ Program (SMG) is an online educational activity for students that has served more than 12 million young people in grades 4-12 since its inception in 1977. SMG introduces students to the financial markets with its integrated curriculum as they learn math, economics and the importance of long-term saving and investing. Teams of 3-5 participants invest a hypothetical $100,000 in real stocks, bonds and mutual funds, learning cooperation, communication and leadership as they manage their portfolio.

In August 2009, Learning Point Associates, a leading educational research firm, completed a two-year study funded by the Financial Industry Regulatory Authority (FINRA) to test the efficacy of the SMG program. The findings showed that SMG substantially improves student math scores on standardized tests and improves student investor knowledge. The study also showed that teachers were more likely to engage in financial planning practices as a result of teaching SMG.

Additionally, the first Nation’s Report Card on Economics, released in 2007, found that students participating in a stock market game scored a statistically significant higher score on standardized tests than students who had not participated. Lastly, in six consecutive reports over a 12 year period, the biannual survey by the Jump$tart Coalition for Financial Literacy also found that students that participated in a stock market game scored higher on the Jump$tart financial literacy survey than students that did not participate.

Teachers use SMG because it works. Students have fun, they learn at the same time and the program is easy to integrate within a teacher’s subject area. The success of the Stock Market Game demonstrates the commitment of the financial services industry and SIFMA member firms over 32 years to provide high quality investor education. SIFMA member firms and the SIFMA Foundation are dedicated to ensuring that people of all ages and backgrounds have access to the knowledge and expertise of industry professionals, striving together toward a more fully informed investing public.
