**Galloway Township, NJ** - Anyone interested in earning a Master of Arts degree or advancing his or her career through various professional development courses is invited to learn more during two informational sessions presented by the School of Graduate and Continuing Studies at The Richard Stockton College of New Jersey on **Tuesday, Oct. 28, 2014**.

The Graduate Admissions staff will provide information on “why you should choose a distinctive Stockton education” and explain what’s required for admission.

The professional programs to be outlined from 5-6 p.m. in the Campus Center Theatre are:

- The Master of Business Administration (MBA) program, designed to offer knowledge in management, marketing, information technology, business law, as well as strategic and critical thinking, problem solving, professional conduct and the contributions of diversity to organizations;
- The Professional Science Master's (PSM) in Environmental Science, designed to provide working professionals and qualified undergraduates with an education that prepares graduates for professional advancement in the business and regulatory worlds;
- The Master of Science in Computational Science (MSCP) program, an interdisciplinary field involving applied mathematics, computer science and other disciplines such as science, engineering and business used for quantitative analysis and predictions.

The Master of Arts information session will be held from 5-6 p.m. in the Alton Auditorium, on the second floor of A-wing, and will cover:

- The Master of Arts in American Studies (MAAS) program, which delves into American history and culture with an interdisciplinary approach, and enables teachers and other professionals in public history, non-profit, public relations, law, government, libraries,

journalism and related fields to improve their professional qualifications. The program's international approach to American studies will prepare graduates to understand globalization and the relationship of the United States to different parts of the world;

- The Master of Arts in Education (MAED) program helps certified professionals develop into master teachers. Students will strengthen their content knowledge, learn new instructional strategies to meet the needs of diverse students, engage in effective practice, and develop as teacher researchers;
- The Master of Arts in Instructional Technology (MAIT) enables graduates to use technology as a tool to enhance learning and training. Graduates of the MAIT program can become leaders in the fields of education and training and may qualify for positions in the areas of curriculum design and development, technology coordination, distance education planning, integration of technology in teaching, human performance support, instructional design and training development, and project management;
- The Master of Arts in Criminal Justice (MACJ) provides knowledge of how and why people engage in crime as well as an understanding of the issues faced by practitioners in the criminal justice system. MACJ graduates are employed in all sectors of the criminal justice system, including the Secret Service, the Federal Bureau of Investigation, the Transportation Security Administration, corporate security, probation services, the Division of Youth and Family Services, crisis intervention centers and halfway houses;
- The Master of Arts in Holocaust and Genocide Studies (MAHG) is a central component of Stockton's commitment to study the history of the Holocaust and other forms of genocide, and to teach the lessons derived from such study. New Jersey teachers, in preparing youth for responsible citizenship, are required in both primary and secondary schools to include Holocaust and genocide studies in their classes. In addition to educators, the program is useful to other professionals seeking individual growth, and as a first step toward doctoral work.
