Galloway, NJ— According to the Richard Stockton College/Zogby Poll commissioned by the William J. Hughes Center for Public Policy, likely voters in the new 9th Legislative District favor the incumbent Republican legislative team of Senator Chris Connors (R), Assemblywoman DiAnne Gove (R), and Assemblyman Brian Rumpf (R) over their Democratic challengers, Senate candidate Dorothy Ryan (D) and Assembly candidates Carla Kearney (D) and Bradley Billhimer (D).

Connors leads Ryan by nearly a 2 to 1 margin, garnering 46% of the vote compared to Ryan's 24%. Of the likely voters surveyed, 2% wanted someone else and 28% weren't sure.

Among the Assembly candidates, Assemblyman Brian Rumpf led all the candidates with 40%, followed by his running mate Assemblywoman DiAnne Gove at 32%, with the Democratic challengers Bradley Billhimer and Carla Kearney trailing with 22% and 21% respectively.

"The Democrats' chance of making up this much ground relies on their ability to convert nearly all of the 'not sures' to their voters. This is a difficult task for the challengers since less than 25% of the voters are familiar with them," explained Daniel J. Douglas, Director of the William J. Hughes Center for Public Policy.

When asked about whether New Jersey was headed in the right direction or was on the wrong track, 56% responded that the state was headed in the right direction while 36% thought New Jersey was on the wrong track.

In line with these numbers, Governor Chris Christie was viewed favorably by 67% of those polled, while 33% viewed him unfavorably.

President Barack Obama, however, found himself upside down in his favorability ratings, with 43% viewing him favorably and 56% viewing him unfavorably.

K-12 education, healthcare, economic development and senior citizen programs were identified as the top four New Jersey state budget areas that should receive priority funding.

The Stockton-Zogby poll* of 600 likely voters in the new 9th Legislative District was conducted from September 20 – 27. The poll has a margin of error of $\pm 4.1\%$.
