RE: Revision to reflect applicant requesting recommendation for one term instead of two

Dear Provost Harvey Kesselman and Deans:

The Research and Professional Development Committee met and deliberated rigorously over sixteen proposals requesting a total of twenty-two semesters of sabbatical. Committee members read and commented on proposals before the meeting, then, following the same process that we have followed for many years, we discussed and voted on proposed projects. Our meeting lasted two and a half hours, and, ultimately, the committee recommended funding the thirteen applicants, below, for a total of seventeen semesters of sabbatical. These proposals were well written, the outcomes were clear and reasonable, the projects have intrinsic value, and the outcomes seemed likely to be met by qualified applicants. The recommended projects are listed alphabetically by the last name of the applicant.

Although the committee did not directly consider distribution across Schools in making recommendations, all Schools from which there were applications are represented. There were no applications from BUSN, EDUC, GENS, or HLTH. The committee does not consider program or School needs in making its recommendations.

**Specialized Machinery or Equipment**

**Nikon Instruments, Inc. (514039)** **FY14 \$70,500**

This bid waiver is for purchasing new microscopes. The Geology program is currently using 8 Nikon microscopes, in order to provide the students with continuity in teaching, it is essential to have all the students in the class using the same (manufacturer) type microscope. Different brands of microscopes all have slightly different designs and thus different methods of using various features. We are obtaining these microscopes directly from the manufacturer to obtain the best possible pricing. (Reference: N.J.S.A.18A:64-56 (a) [10, 27])

**BIOPAC Systems, Inc. (514042)** **FY14 \$45,000**

This bid waiver is for the purchase of ten new BIOPAC Systems. The BIOPAC Student Lab System is an integrated system of hardware and software that students use to record physiological data from their own bodies in real-time. Students can measure the following functions: cardiovascular, respiratory, pulmonary, neurophysiology, & muscle physiology. Approximately 175 students will utilize this system in their Biology & Physiology Classes. BIOPAC Systems, Inc. is the only company that offers high caliber software and hardware to measure physiological signals in student labs. Since we are obtaining the system directly from the manufacturer bidding would not be feasible. (Reference: N.J.S.A.18A:64-56 (a) [10])

**Li-Cor Inc., Li-Cor Biosciences. (514045)** **FY14 \$65,000**

This bid waiver is for a photosynthesis instrument and will be used in the following programs: Biology in Biodiversity & Evolution, Botany, Plant Physiology, Tide Marsh Ecology and Environmental Science, and Forest Ecology. This instrument provides quick snapshots of photosynthetic rate to multi factor response curves. The software is interactive with IPad technology. (Reference: N.J.S.A.18A:64-56 (a) [10])

**Student Related Services**

**YMCA Camp Ockanickon, Inc. (515001)** **FY14 \$40,000**

This bid waiver is for the registration fees for the Stockton Orientation Retreat, August 26-28, 2014. Fees include lodging, food, ropes course and other activities. This is a sole source provider; there are no other facilities that can provide these services for 300+ people. (Reference: N.J.S.A.18A:64-56 (a) [03, 17])
